

17 October 2018

ASX ANNOUNCEMENT (ASX: LCK)

Legal proceedings concluded

Leigh Creek Energy Limited ("LCK", or "the Company") is pleased to be able to update the market on the conclusion of the legal proceedings initiated on behalf of the Adnyamathanha Traditional Lands Association ("ATLA") by the NSW Environmental Defenders Office.

As previously announced to the market, the application made by ATLA was seeking judicial review of the decision by the Department for Energy and Mining to allow the Company to operate under an existing Statement of Environmental Objectives. The application also sought an injunction, which was dismissed and announced to the market on 19 September 2018.

The Company is pleased that the injunction application and now the application for judicial review have both been dismissed and that both parties have agreed to bear their own costs.

LCK will continue to work with its stakeholders, the residents of nearby Leigh Creek and Copley, and the communities of the wider far north of South Australia towards offering economic development and employment opportunities as the project advances to commercial development stages.

About Leigh Creek Energy

Leigh Creek Energy Limited (**LCK**) is an emerging energy company focused on developing its Leigh Creek Energy Project (**LCEP**), located in South Australia. The LCEP will produce high value products such as electricity, methane (synthetic natural gas) and ammonium nitrate products (fertiliser and industrial explosives) from the remnant coal resources at Leigh Creek, utilising In Situ Gasification (**ISG**) technologies, and will provide long term stability and economic development opportunities to the communities of the Upper Spencer Gulf, northern Flinders Ranges and South Australia.

The Company is committed to developing the LCEP using a best practice approach to mitigate the technical, environmental and financial project risks.
